Hackathon 2024

Meet the team

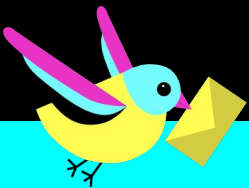

Open Payments integration for shopd

- **Christiaan van Zyl**
- Full Stack Web Developer
- ERP and e-commerce systems integration

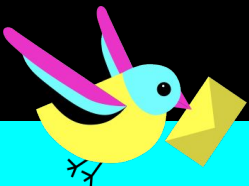

Problem statement

- **No standard interface** for payment integrations
- Small merchants want to **connect directly to clients**
- They want to run their **independent e-commerce sites without vendor lock-in**

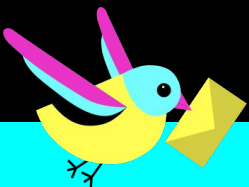

Solution

- Create a shopd payment integration with the **Open Payments API** for interactive grants. Of course!

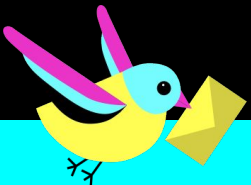

What is shopd?

- Hugo compatible e-commerce plugin for the Caddy Web Server
- Hugo is a **static site generator**
- For users that know **HTML and CSS with Hugo Templates...**
- Enables **customization and platform independence**

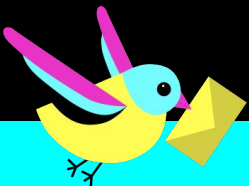

What are the benefits?

- **One payment integration** to access many processors
- Complies with **open web standards**
- More **accessible to independent merchants**
- Merchants connect directly to clients **without vendor lock-in**

Demo

- Let's watch the demo video

Conclusion

- The **Open Payment API** integration
- made **interactive payments easy**
- will **help merchants to be more independent**
- **Next Steps:**
- If anyone would like to **collaborate on the <https://shopd.link> beta release** please reach out to me afterwards, or click the **"Join Waiting List"** button on the site
